

Secure-Dox - CHART AND FORM MANAGEMENT SOLUTION FOR ASCs

HIGHLY AVAILABLE AND SECURE (HIPAA-COMPLIANT) CLOUD BASED SOLUTION

BEFORE

AFTER

- **Is collating and editing forms a tedious task for your center?**
- **Are you satisfied with your existing paper chart workflow and storage?**
- **Are you looking to convert to a paperless Chart storage and eliminate storage costs?**
- **Are you looking for an easy solution to manage your Charts without making a huge upfront investment in hardware and software?**

Secure-Dox is an innovative and HIPAA-compliant Cloud-based solution for Surgery Centers. It is an easy to use solution that allows users to manage Forms and Patient Charts. Additionally, it streamlines workflow with Secure-UNO and SecureXFlow thereby improving staff productivity and patient care. All this with no upfront costs and guaranteed savings for your office!

Try Secure-Dox and find out how it transforms workflow in your Surgery Center. You will never go back to paper Charts and storage. It pays for itself.

WE BETTER THE BUSINESS OF MEDICINE

Key Features

- Highly available, secure (256 bit encryption) and **HIPAA-compliant** Cloud based solution for Form and Chart management.
- **Live interfaces** with popular Practice Management applications (HST, SIS). Easy to get started rightaway.
- **Audit and Complete Charts easily** online or in our desktop **Secure Scan Client** application. A unique feature that tracks Forms not scanned back into the Patient Charts.
- **Self-managed, customizable Forms and Templates** setup. Use existing Forms or create new Forms anytime. Setup Forms to populate with any data from the scheduling interface.
- Admin access to **customize user permissions** based on roles. **Logs** for tracking and compliance.
- **Intelligent barcode scanning** and **label printing** process - scan paper in any order and stack size. **Smart labeling** automatically renames and stores the scanned documents in appropriate tabs in the Patient Chart.
- **Search archived Charts easily.** All Charts are available anytime and anywhere. Old paper charts can be archived in your office using **Secure Archive Client** or we can do it for you.
- **Robust Print Options** By Time, By Room#, By Surgeon, One-sided or Duplex, etc.
- **Integration with SecureXFlow** (Online Transcription Workflow) enables transcribed reports to be automatically saved in the Patient Charts.
- **Integration with Secure-Fax and Secure-UNO** allows faxes to be saved in Patient Charts with just a few clicks without printing or scanning. Send Forms to Surgeons to review and sign online on their preferred device. Give access to all or selected Forms from archived Patient Chart to the Surgeons.

Benefits for Surgery Centers

- Easy to use and implement with **minimal training**. All you need is a PC, printer and scanner to get started!
- **Improved workflow** allows reduced time spent on scanning, printing, searching, tracking and better patient care.
- **Browser and Device Independent solution** - A true **Plug and Play** solution. Use any device (iPad, PC, Mac etc.).
- Reduction or elimination of paper storage costs and easy online access to all Patient Charts. **Huge savings in Storage and Retrieval costs.**
- Save on printing and collating labor costs. **Change or create new Forms and Chart Packs anytime.**
- **Significant savings** over your existing solutions.
